# BRAIAN TRONCOSO
## F U L L S T A C K   D E V E L O P E R

Córdoba, Argentina. Móvil: +54-9-3571-638693. 09/05/1996

https://www.linkedin.com/in/braian-troncoso-0aaa56211     troncosobraianaxel@gmail.com     https://www.braianaxeltroncoso.com/

I consider myself a highly qualified professional in incident resolution and requirements development, organized, creative, with great teamwork skills. Effective communicator with solid technical background, always updated and focused on high quality results.

## WORK EXPERIENCE

### FullStack Developer
Invisible Geeks | September 2024 - Actuality
Pozuelo de Alarcón, Comunidad de Madrid, España ·Remote

- Web application development using Laravel, Vue.js, Docker and Docker Compose, applying agile methodologies such as Scrum.
- Complete management of a project, from analysis to implementation, ensuring quality and compliance with objectives under my own criteria.
- Implementation of solutions with artificial intelligence using engines such as ChatGPT-4 and Gemini, integrating them in projects for automation and advanced customization.
- Use of tools such as Jira, Git and GitHub for workflow coordination and control.

### FullStack Developer
Afila Fácil Pyme, WorkFlix, INKUA, Quinto Elemento | February 2022 - September 2024

- I developed a unified platform of components and tools for various products of the company, optimizing technical convergence and accelerating product delivery. I also reviewed and approved pull requests, corrected issues, and provided support to my colleagues to improve development.

- I sub-led the development of a web system, participating in both frontend and backend development. Together with the project leader, we organized and coordinated with the project manager to meet all guidelines and deliver a scalable product with good practices, following the Scrum methodology.

- I migrated a stock control system created in MS-DOS to Django to run on localhost. This implementation allowed the automation of tasks that were previously performed in a less intuitive system.

- I developed an application with a microservices oriented architecture, where the backend was consumed by both mobile and web clients.

Technologies by company
**Quinto Elemento:** Java, SpringBoot, ReactJS, Ionic, Capacitor, Docker, Hibernate, JPA, MariaDB, Axios, Trello.
**Inkua:** Javascript, NodeJS, HTML, Bootstrap, Angular, HttpClient, API-REST, Postman, Git, Github, Jira, MySQL.
**WorkFlix:** Java, SpringBoot, Angular, Docker, Android, API-REST, MySQL, JUnit, NodeJS, Typescript, Postman.
**Afila Fácil Pyme:** Javascript, Python, Django, HTML, Bootstrap, API-REST, Postman, Git, Github, Jira, MySQL.

### DevOps Trainee
Hedy Software | Marzo 2024 - Julio 2024

- I deployed projects in Google Cloud and Cloudflare, managing specific versions of each image and taking care of load balancing and management of various tools to ensure quality work.

Technologies
Linux, Google Cloud, Cloudflare, Docker, Kubernetes, Vagrant, Git, Github.

## ACADEMIC DATA

**UTN Universidad Tecnológica Nacional**
Senior Programming Technician : Jan 2022 - Dec 2023

**ISPC Instituto Politécnico Superior de Córdoba**
Web and mobile application development technician | Jan 2022 - May 2024

**Certifications:** https://github.com/BraianTroncoso/Certificaciones     **Spanish:** Native     **English:** Intermediate level

## SKILLS

**Java - SpringBoot - Python - Django - Javascript - Node - Php - Laravel - Filament - Git - Boostrap - Html - Angular - Linux - Github - Css - MySQL - Docker - Kubernetes - Scrum - Jira - MongoDB - MariaDB - SQL - Postman - Swagger - Ionic - Capacitor**
